## PART 1: INTRODUCTION

Tourism, a rapidly growing industry with significant global economic impact, remains a highly attractive focus for many countries. It offers straightforward evidence of bringing both economic prosperity and environmental challenges. According to Malaysia Tourism Statistics in 2023, Malaysia saw a substantial increase in foreign visitors, with 26 million individuals entering the country. However, popular tourist destinations often become crowded, with only a few places like Kuala Lumpur standing out. Considering this, our group has focused on creating a website to promote tourism specifically in Cyberjaya and Putrajaya. Our aim is to highlight and recommend these attractive yet often overlooked tourist spots, providing a valuable resource for visitors seeking new destinations in Malaysia.

To enhance user management and browsing experience on our website, all the main ideas of the website's page are kindly divided into a few parts. Firstly, the homepage plays the featured destinations, and designs are selected with related images ingeniously as the background and highlight the topic of the website. The register form is prepared for first-time users to register their information, such as their user ID and password, for identification and personalization.

Upon logging in, users are directed to a landing form where they can view announcements, and click links to package category and cart pages after logging in. On the other hand, the admin dashboard is created so that only staff can manage this part of the website, such as editing or deleting their own personal information and organizing the needed information for the user page. In the staff page, there are a few sections, such as manage staff pages for the information of the admin, manage product pages for editing and selecting the packages of the tourism plan, and a category page for creating an extra captivating destination for adding to the user place selection.

Our website also features an About Us page, providing all the brief information about the website created. The Contact Us page will offer the contract form after the confirmation of the users to select their package. Next, the main category page will show the 4 categories of travel destinations, such as leisure places, shopping centres, cafes, and hotels. Users can select a category to view specific destinations, each with detailed descriptions, including contact information, map location, reviews, and social media links.

Afterward, users can add their chosen destinations to a list, view daily travel plans, and select from various travel packages, all managed through a user-friendly interface. When the user opts for the package, they can browse their package on the shopping cart pages and move to the payment pages for the payment details. After payment, a comment and rating form allows users to leave feedback and rate their experiences with the products and the services of the website. This structured approach ensures both users and staff can efficiently navigate and manage the website, enhancing overall usability and satisfaction.

I have been here a couple of times as it is walking distance from my home. The place is quiet and I normally there for the mushroom pie today I had banger and mash. I am not the kind that likes processed food but I found the food to be pricy and I go there because like I said near to my home.

I decided to have a quick lunch at this cute little cafe at the corner of Shafsbury Cyberjaya.I think this place has good quality food for the price they offer. The interior decoration is also soothing to the eye and there aren't many people dining in.

What's nice here is the ambience of the cafe and the spacious environment. Good place to have tea with friends. However food selection very limited ( no main meal for now). Cake and pie kind of ordinary ( just personal opinion).They had discount for now ( newly open). The awkward moment is when u had a plastic spoon for your coffee. First time ever for me when visiting such a cozy cafe 😊 ...

The screenshot shows the 'Manage Users' page under the 'P&C' header. It features four summary cards: 'User activity this month' (20,200), 'Page views' (86,889), 'Monthly revenue growth' (RM 68,120), and 'New E-mails received' (530,240). Below these are search and sort filters. The main table lists four users:

It displays '20,200 User activity this month' with a progress bar. Below this are search and sort options. A list of users is shown with columns for ID, name, and email. The first few users listed are:
 

- #1001 Emma Grace Johnson emma@gmail.com.my
- #1002 Isabel Kho isabell98@gmail.com.my
- #1003 Syafiq Rizwan bin Mohamad syafiq0802@gmail.com.my
- #1004 Yulia Sergeyevna Ivanova uliaaaa@gmail.com.my

 To the right of the user list is an open email window titled 'Exclusive Trip Package Discount Just for You!'. The recipient is 'emma@gmail.com.my <emma@gmail.com.my>'. The subject is 'Exclusive Trip Package Discount Just for You!' and it was saved at 11:57 AM. The body of the email starts with 'Hi Emma,' and includes a message about an exclusive discount on trip packages.

When admin adding users manually, system will prompt:

A modal dialog box is centered on the screen with a dark background. At the top, it says 'This page says' followed by 'Enter Your Name :'. Below this is a text input field with a blue border. At the bottom of the dialog are two buttons: 'OK' on the left and 'Cancel' on the right. Behind the modal, the main application interface is visible, showing two cards: one for 'Page views' with a value of '86,889' and another for 'Monthly revenue growth' with a value of 'RM 68,120'.
